Family Information

This new influential sire is relatively maple leaf free and offers Canadian type without Laurie Sheik or Gypsy Grand bloodlines. ASHMORE's sire, Titanic, still ranks very highly in the Canadian LPI lists as he has for many years. ASHMORE's family is one that will surely play a much larger role in the coming years as his brother's rank very highly within the breed already. My Lady's Manor Farm in Maryland has had success with high ranking sons and the show ring alike, a feat that is hard to achieve by any breeder. ASHMORE is 1 of 10 maternal brothers sampled by different AI companies. Not many bulls can high components with breed-leading udder composites, ASHMORE does just that!

Daughter Information

ASHMORE daughters spell type with extremely snug, youthful mammary systems, correct teat placement and strong clefts and wide, silky rear udders. Overall, ASHMORE daughters are tall, long and extremely dairy but need to be protected for strength in the front end and width in the rump. They track on sound feet, straight legs, extremely steep foot angles along with plenty of quality of bone. With over +2.5and Udders and +1.5 Legs and Feet, this bull can be used with confidence to make the fancy type.

Mating Information

ASHMORE can be used in the heifer pens on daughters of AFFIRMED, BOLTON, BREAKOUT, DRAKE, DUNDEE, GARRISON and SHOTTLE, in addition to daughters of Durham blood, Outside, and Goldwyn.
