Best Record: 3-11 3x 305d 13162kgs 4.25%F 559kgs 3.41%P 449kgs

Family Information

One of the premier cow families to emerge in the UK in recent times are the Kimos, tracing back to the 54* brood cow Inspiration Kimo. She was developed at Painley and decedents are to be found all over the UK today. The family continues to deliver excellent production, top quality udders and tremendous feet and legs wherever they are. SIRIUS's dam was tested through the MOET evaluation programme, and graduated with flying colours for type and production but also exemplary secondary traits.

Daughter Information

SIRIUS daughters are moderately sized, yet offer adequate strength and added power. He widens the rump, and leg set is near perfect with extra heel depth. As his locomotion score bears testament, SIRIUS's are seriously good on the move. For such a high production sire, SIRIUS maintains exemplary udder traits, and he will add cleft, and set the udders high and wide. Daughters exhibit super udder texture.

Mating Information

SIRIUS is a calving ease sire and will cross well on daughters of SHOTTLE, MELODY, NANSEN, PIPPEN, REECE, Outside, Boss Iron

Daughter of SIRIUS
Tillislow Sirius Mary
