6	7020	305	3.88	3.61

Ballybride Dano was purchased from a typical Irish Grassland Herd. His dam, Bernadette is one of the highest EBI cows in Ireland, which basically means that she is amongst the most extreme cows for production, protein and fertility traits. She calved her 9th this spring and is already in calf again for her 10th. Her extremely consistent calving pattern and protein production make her a truly profitable grassland cow. Dano now has an EBI genomic proof, which ranks him in the top 15 sires in Ireland for EBI!
