- Dick Smith, Head of Jersey Sire Acquisition in USA selected Simba. Here are his comments. *“This pedigree is a parade of the worlds best Jersey bulls (Jace, Lemvig, Berretta and Lester) represented by a very sound group of no-nonsense cows in a 1,000 cow, profit-oriented dairy. This herd is very near the coast in Tillamook, Oregon. (Pacific Northwest) The climate would be very similar to the UK, with a year-round influence from the sea.”*
- SIMBA is from a money making VG Lemvig daughter that averaged 58 days open across her first three lactations, phenomenal fertility! She calved the 4<sup>th</sup> time at 4 years and 10 months of age, milking 99lbs (45kgs) a day! Next dam is a VG Berretta that calved for the fourth time at 5 years of age. Next dam is a VG Opportunity daughter that calved the 6<sup>th</sup> time at 6 years 8 months. Next dam is a VG89 Lester daughter. This family offers super fertility and cows built to survive in any system.
