

FH2625 DEANGATE QUENTIN

by Bill Foster

Deangate Quentin's first milking daughters are performing very well. Quentin is bred from a great cow family and he is an easy calving sire.

MGGGD: Deangate Queenie 2nd, by Petteril Brandy
10 lactations average: 7,742kg 301days 4.16%F 3.33%P

Family Information

QUENTIN is bred from a great cow family. Deangate Queenie 14th, his EX93 dam, is milking well in her ninth lactation having calved regularly each year and her dam was one of 3EX and 2VG maternal sisters. The Queenies have won the cow family award in the Staffordshire herds' competition on two occasions, ahead of all the Holstein families.

Tittenser Hylke, the sire of Quentin, was initially proven in Ireland and he now has a widespread proof in the UK with more than 1000 milking daughters. Hylke is outstanding for fat and protein percentages and he is also one of the top ranking bulls for daughter fertility.

Daughter Information

QUENTIN sires medium sized Friesian type cows, with shallow udders and strong ligaments. Many of his daughters are out of part Holstein cows and Quentin adds strength and longevity. Quentin is an easy calving sire.

Mating Information

QUENTIN provides a good cross for Holstein breeders looking for a slightly stronger Friesian type cow. He is also ideal for Friesian breeders to use on daughters of Marshside Rocket 3rd, Newfailand Mr Frosty, Foxhole Panatella, and Dovea Sem.
