Deangate Queenie 9 (after giving 105 tonnes)

The first daughters of Deangate Tarquin are milking well, with high fat and protein percentages. They have impressive udders and good legs and feet. Deangate Queenie 9th BFE94(6), the dam of Tarquin, has given 108 tonnes of milk so far and she looks fantastic milking in her 13th lactation. The Queenies are a great cow family and Queenie 9th is one of five maternal sisters that have done very well, with three classified EX or VG.
