

SANDY-VALLEY DENETHOR-ET*TL*TV

By Susie A. Martin

DENETHOR has a very pleasing profile, outstanding type, udders, feet and legs. In addition, he sires a nice balance of production along with desirable heath traits. Furthermore, his cow family has long history of success.

Family Information

DENETHOR is a successfully proven son from the world famous Dellia's and he was bred by Sandy-Valley Farms, Scandinavia, Wisconsin. He is sired by the German bull 204HO695 Laudan. Laudan is sired by the successful German sire Lukas and his dam is an EX Raider. Laudan is a breed leader for productive life and his daughters excel in udders and mobility. DENETHOR'S Outside dam was an impressive tall cow with great width both front and back. She had plenty of bone and a well attached udder. Laudan was a logical cross on Outside Della 3134. DENETHOR has an EX-90 full sister, Laudan Dotty. She is currently in her 3rd lactation at Sandy-Valley. Dotty peaked at 178 lbs/day and has a 305 day projection of 41,129 pounds of milk. The 3rd dam Elton Daylite is the dam of 7HO6759 Morgan.

Daughter Information

DENETHOR is an udder specialist. The daughters have youthful udders with tightly attached fore udders and good height and width to the rear udder. In addition they have very strong clefts. They are average to above average in size and are dairy and open ribbed individuals with plenty of depth and width of rib. They have level and hard topped rump structures. DENETHOR daughters do tend to be a little straighter in the leg.

Mating Information

DENETHOR is not recommended for the heifer pens and works well on milking daughters of SHOTTLE, BOLTON, REECE, NANSEN, GRANDVIEW, GARRISON and JAMMER.
