

29HO11605 Coldsprings GABE-ET TL*TV by Tim Abbott

GABE comes from the Cardinal Elate family developed by Coldsprings Farm, New Windsor, MD. Coldsprings Farm now consists of a herd of over 1,000 head in a very competitive environment. The herd is one of the top in the nation for its size for type and production and the animals in the herd have been bred for generations by the Hoff family to make profitable cattle. GABE'S family is one of the finest at Coldsprings and his reliable, high type genetics can seamlessly add appeal and profitability to all dairy operations.

Family Information

GABE's dam, Patron Genie, comes from one of Coldspring's finest maternal lines. Genie, who we contracted as a virgin heifer calved in and went GP-83 as a two-year-old. She improved each day and as a 4 year-old classified EX-90. She produced over 40,000 pounds of milk and nearly 1800 pounds of fat in the commercial setting of Coldsprings Farm. She already has 8 Very Good daughters and several sons that have returned to A.I. service. Her dam was Elate, one of the great cows Marlin Hoff ever owned. She was a massive ribbed cow with a great udder, producing over 43,000 pounds of milk and over 1800 fat while classifying EX-94. She has produced over 214,000 pounds of milk in her lifetime. Her dam was a hard working Blackstar who completes the third generation of cows to produce over 40,000 pounds of milk actual in this same herd. Her dam was a great Chief Mark that Coldsprings took out on the show circuit. She is EX-94 with some great records to her credit. If you saw this family the thing that would hit you is their tremendous width of chest and muzzle. It is one of my favorite cow families in my area today and you will see many decedents of this maternal line in the ABS young sire program in years to come.

Daughter Information

GABE is a bull that should sire great width and power. Both sides of his pedigree are known for cattle that have great wide muzzles and tremendous width of chest. They have a will to compete and earn their spot in the herd. He will not add openness or depth to the rib. His width allows for wide rear udders that have great capacity for milk volume with a good center support much like the family.

Mating Information

GABE should be used on daughters of Stormatic and Goldwyn along with, GARRISON, BOLIVER, BURT and PIPPEN.
