Genus Breeding

Juror Ford Sons give another Dimension

Genus ABS are pleased to announce the release of two new exciting Juror Ford sons, Far-O-La Grayson and MOET Skavlan.

Grayson is a new US graduate who combines high fat percentage with plenty of strength, low angularity and impressive udders. He is a fitness specialist too, with high ratings for longevity and somatic cell count improvement, providing UK farmers with Long Life Cows.

Skavlan is another graduate from the MOET herd, being a Juror Ford off the famous MOET Marconi Scooter EX. Scooter is a real favourite at MOET having given over 60 tonnes lifetime to date, as well as being the udder on the "Valiant Udder Care" adverts in the past. It is this longevity and workability in cubicle systems that shines through with Skavlan. He is high in milk with negative somatic cell count and a fantastic UK type score. He also scores high for locomotion added to this good strength and depth makes Skavlan an exciting new UK bull.

Both Grayson and Skavlan are currently on offer to Cornerstone Breeding Club Members at £16 and £12 respectively.
