Genus Breeding

Shottle Show Queens

In the past few weeks both first and second crop daughters of Picston Shottle have been enjoying great success in shows around Europe. Firstly Bassingthorpe Shot Daisy EX94, owned by the Daisy syndicate, became the first milking UK Holstein to be shown in milk at the German national show in Oldenburg. In the third calver class Daisy came second, which is a superb achievement for a first crop daughter.

A few days later at The Royal Cornwall Show, Wills Brothers Ltd of the Willsbro herd had a fantastic day taking first and second place in the third calver class, with Overside Shottle Sunshine EX92 and Bidlea Shottle Angel EX. Angel and Sunshine also combined to take the pairs class later in the day.

Finally the impact of Shottles impending second crop proof was seen with Avenham Shottle Venice 2 of J R Williamson & Co, being placed third in a strong heifer in milk class at the Cheshire Show.
