Genus Breeding

Belgian Blue Star Passes Away

Springfield Patrice the Belgian Blue sire owned by Genus ABS has recently been laid to rest.

Patrice sired around 150,000 progeny, giving him the accolade of Diamond Sire within the Genus ABS Beef Breeding Programme, and with over 250,000 straws of semen sold around the world, he is by far the most prolific Belgian Blue sire to ever live within the breed.

Neil Wharton, Beef Director for Genus ABS commented, "Patrice has been the shining light of our Belgian Blue stud and although we have lost a great bull, his legacy will carry on through his progeny."
