Genus Breeding

NEW SIRE BRED AND TESTED BY UK FARMERS

Aintree Northside follows in the footsteps of other UK tested sires like Picston Shottle and Burlane Tennyson this proof run as he graduates from the Genus ABS Cornerstone Breeding Programme

Aintree Northside is a UK bred Comestar Outside son, tested in the UK and debuts in the top 15 UK proven bulls with a Type Merit of +2.4. Andrew Rutter, Genus ABS Breeding Programme Manager says, "Combining a Mammary score of +2.35 with good feet and legs, Northside daughters have been creating a stir with Cornerstone members around the country, being heifers that catch the eye and perform well."

Mr Rutter continues, "Northside's dam is Aintree Mtoto Nugget B EX91 3E from the Nugget family, rated as one of the top breeding families in the UK. Developed by Richard Pilkington in his Aintree herd from North Wales, this family is rightly drawing global attention. The combination of type, strength, components and production in one package makes them a very special opportunity. The foundation cow, Sebastian Nugget has bred 21 Excellent and 37 VG female descendents already, and members that have gone on to other herds have performed excellently."

Alongside impressive conformation traits, Northside also offers significant improvements in fitness traits being positive for daughter fertility at +2.9 Fertility Index and adding longevity at +0.4 lifespan.

Aintree Northside was tested through Cornerstone and as such is available at an exclusive offer of £15 to Cornerstone members as a thank you for their participation in the Genus ABS progeny testing programme.
