Genus Breeding

BURLANE TENNYSON DAM SCORES EX93

Burlane Tennysons' dam, Burlane Mtoto Tracy has recently scored EX93, completing eight generations of straight Excellent.

Tracy, who scored 93 points in the udder in her fourth lactation, typifies the way that the Trina family develop with age. This is synonymous of the Tennyson daughters milking around the globe.

Bred in the UK, Burlane Tennyson EX91 was dual tested through the Cornerstone Breeding Club in the UK and Australia and today is Rock Solid with milking daughters in both countries. Andrew Rutter, Breeding Programme Manager comments, "We already have our first Tennyson sons on the ground that will be sampled through the Cornerstone Breeding Programme. Justifiably Tennyson has proven himself as one of the most popular bulls in the country, having more progeny registered than any other bull in recent months."

Tennyson appeals to the global market through his rare combination of high production (+700kg milk) with positive daughter fertility (+3.8) alongside positive lifespan (+0.1) and somatic cell count improvement (-9%). At 1773 TPI points Tennyson also ranks favourably in the US which increases his profile globally as seen in our semen exports of the bull, currently being exported to the USA, Canada, Australia, South Africa, and 12 European countries.

"Tennyson sires daughters that are quiet mannered, easily milked and with good locomotion. He adds teat length and with super udder scores, they are good to look at in the parlour. His daughters, like his maternal line, get better with age, developing into tremendous dairy cows with plenty of power and substance. Tennyson combines these favourable type and management credentials with high PLI based on more than 100 daughters working on UK farms in UK conditions, giving us huge confidence in his ability to provide British dairy farmers with the cows to help drive profitability on their farms," concluded Mr Rutter.

Tennyson is available at £20 as conventional semen or £40 sexed semen. Cornerstone members can purchase sexed Tennyson semen at the exclusive offer price of £34.
