

29HO13426 Ufm-Dubs GOLDROY-ET*TL*TV

By Tom Harkenrider

GOLDROY writes an exciting pedigree for the true-type breed enthusiasts. This early Goldwyn son is from a ROY and will deliver outstanding type. He has the ability to make the great ones! The GOLDROY daughters will increase the fat percent in the milk tank as well as high quality milk (SCS) premiums. In addition, the daughters have the ability to breed back quickly (DPR) and stay in the herd for several lactations (PL).

Best Record: 4-01 2x 305d 27360M 3.7% 1012F 2.9% 780P

Family Information

GOLDROY was bred by Stephen Van Tassell in Millbrook, NY. The family behind GOLDROY has been of interest for a number of years due to the unique sires in the pedigree and the extreme fat test. The ROY dam, Eroy was a great young cow that generated world wide attention. Stephen flushed Eroy as a 2 year old to AltaAllegro, SHOTTLE and Goldwyn, then sold her at the Snapshots of Starmark Sale in OH to Nova Holsteins & Friends in WI. Nova & Friends liked the Goldwyn cross so well they flushed Eroy to him again, thus resulting in the "Fab Five" as they are called. All told, Eroy has 22 daughters scored VG from 7 different sires and more heifers waiting to calve to add to this impressive total. ABS has multiple sons awaiting sampling from the SHOTTLE and Goldwyn daughters of Eroy.

Daughter Information

Daughters have loads of style being taller with a clean, flat bone & open rib. The daughters track straight from the rear with a little more flex in the hock and a strong pastern. The udders display great venation with a snug fore attachment and nice rear udder.

Mating Information

GOLDROY is the ideal mating on cows needing a cleaner, flatter bone. He will cross well on Mtoto, O-man & Outside bloodlines as well as daughters of AFFIRMED, ATLAS, BOLTON, DUNDEE, DRAKE, REECE and SHOTTLE.
