Note: Next 3 dams tested 4.5%, 4.5% and 4.3% respectively.

Family Information

HOMESTEAD was bred by Bomaz Farms in Hammond, WI and acquired from Richard Miller of Menomonie, WI. Bomaz Farms milks over 500 cows in a large free-stall. HOMESTEAD's dam, 1551, was a big massive all white cow with youthful udder and ideal feet and legs and always a visitor favorite. ABS has invested heavily into 1551 by sampling 10 sons (3 Hershel, 1 Moe, 1 Brant, 3 Lookout and 2 Detroit) plus she has 2 DIE-HARD and 2 Lynch sons standing at ABS awaiting sampling. The sire of 1551 is Peckenstein Prelude Finale. He was a Prelude son x Blackstar that died in waiting at Select Sires. Today Finale is still over +.15% Fat and over +1.00 on type. The dam of 1551 is an awesome Highlight cow that made nearly 170,000 lifetime and is the only cow in the 6 generations behind HOMESTEAD that tested less than 4.3 for fat%. 1551 has VG maternal sisters by Outside and Gibson. HOMESTEAD has one EX full sister and 4 VG full sisters plus an EX Rubytom sister (Finley son sampled at ABS), a VG Justin sister, a VG Amateur sister.

Daughter Information

As his proof states, HOMESTEAD daughters are solid milk cows with high fat test. Type wise, daughters are tall wide, strong, deep ribbed cows that milk from their strength. Legs are straight when viewed from the side but track very straight when viewed from behind with an awesome foot. Udders are shallow with a deep seem and snug fore udders.

Mating Information

Use HOMESTEAD on milking daughters of GORDON, PIPPEN, MACHOMAN, OZZIE, S-MAN and Lee, Stormatic, Igniter and Inquirer.
