7	7239	305	3.57	3.43

*Killingley Hugo Sijke*

*Destiny Sijke is another high EBI young sire to come out of the highly respected Killingley herd of John Kingston. This 200 head herd has been bred for Protein and Fertility for many years now creating genetics most suitable for the intensive grazing markets of Ireland and the UK. The dam of Destiny Sijke is an exceptional Royal Hugo daughter, widely considered to be the best bull to come out of New Zealand. Sijke Hugo performed very well over two lactations so far with good yields and fantastic components. She is a strong type cow having plenty of strength throughout with a very well attached udder. We were also very impressed with the cow family behind this bull, as the g.dam and sisters were still performing well in the herd, showing the families true consistent transmitting pattern. Destiny Sijke is an extremely exciting young bull combining some of the best grassland genetics available on both sides of the pedigree giving him massive potential to become a high profile EBI bull in the future.*
