7	6481	305	3.63	3.43

Killingley Excellency Starlight

Keet Starlight is an extremely high EBI bull bred for the intensive grassland market. His sire Zander Keet has been one of most popular New Zealand bulls of recent years specialising in breeding cattle with good type traits as well as superior Protein % and daughter fertility. His dam is the exceptional Killingley Excellency Starlight, a daughter of the Friesian fertility specialist Lloyds Excellency. Starligh has consistently produced above herd average in a typical Irish grassland farm, where the whole whole herd calves in the spring. This combination of superior production, fertility and longevity in Irish Grassland conditions makes Keet Starlight an exceptional prospect for the future.
