6.	12/02/06	7379	305	4.21	3.63

DAM: Killingley Hugo Clark

GDAM: Killingley Jostar Clark

- Killingley Sjoerd Class represents the best of Irish Grassland Genetics. The Clark family is the most impressive and consistent transmitting family in the profit orientated Killingley Herd. So much so that we have bought 2 bulls from the family this year. The dam of Sjoerd Class is an exceptional Hugo daughter, she is small strong and compact with a snug udder. She is currently milking in her third lactation and is consistently producing at over 3.8% protein. The grand dam Jostar Clark is a rugged type cow, still going strong in her sixth lactation and is also a 3.9% protein cow.*
