

EMMARK MAMMOTH*TL*TV

By Tom Harkenrider

MAMMOTH is a different pedigree for producers, Mr Sam x Storm x an old ABS favorite, MILKLIN. MAMMOTH daughters calve easily, producing moderate volumes of high quality (low SCS) milk for several lactations (PL). MAMMOTH daughters will stand out from their herd mates.

5th Dam: Walnut-Hills Messiah Marcia VG-85 VVV+
Best Record: 2-06 2x 365d 7,990M 4.3%F 3.6%P

Family Information

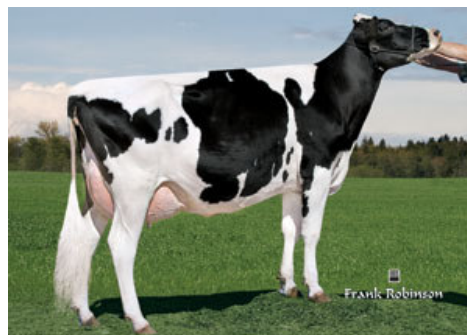

MAMMOTH was bred by Marcus Zook in Miflin, PA. I remember my first visit to the farm to see MAMMOTH's dam as a 2 year old, a tall, gangly heifer with a wide rump and great udder....the kind of heifer that needs time to fill out. She certainly has done that over time, starting out as a GP-83 2year old to a 2E-90 point cow today. Longevity is a characteristic of the family as MAMMOTH's dam & grand dam are still milking in the herd today, finishing up their 4th and 7th lactations respectively.

Daughter Information

MAMMOTH daughters have been a favorite of all groups that have walked pens in recent months. He consistently leaves his mark of sound udders and near perfect feet and legs. All daughters have snug fore and rear attachments and a level udder floor that is well above the hock. MAMMOTH breeds dairy, silky hided cows that have long necks and clean flat leg bone. Legs are ideal from the side with very deep heels and track great from behind. MAMMOTH can be mated to strong powerful cows without a problem.

Mating Information

MAMMOTH will cross well on daughters of BOLIVER, BOLTON, SHOTTLE, HOMESTEAD, Laudan, LENOX and REVOLUTION.
