

## 29HO11403 Eastview MASON TL\*TV

by Tim Abbott

One of the greatest cows ever to live at Eastview Farms is the dam of MASON, Eve MG. She is a tremendous daughter of Durham that could have gone to the big shows. She is from a bit of a different line of the great Mattie family that has produced successful bulls for our program for generations. MASON is the best of the new generation of fine cows at Eastview.

### Pedigree Information

Sire: Comestar Outside-ET TL TV

Lifetime: 168750M 3.7% 6242F 3.1% 5201P

### Family Information

MASON combines a sire stack that many people have been looking for, Outside x Durham. The two bulls should cross well having the style and dairyness from Durham and the high fat and power from Outside. Outside should be the perfect cross on Eve MG, one of the greatest young cows, ever at Eastview. She is an Ex-91 cow with a great dairy frame. She has a tremendous front end with a long neck. She is wide and correct in her rump and has a picture perfect udder. Her dam was an outstanding daughter of Emory with great size and scale and a tremendously wide rear udder. She is out of a VG Elusive daughter that lasted for several lactations producing nearly 170,000 pounds of milk.

### Daughter Information

MASON appears to sire tremendous butterfat, like his sire, Outside. He will add strength and power to his daughters, siring cows that have nice width. They will have some slope to the rump and have great mobility having outstanding feet and legs from every angle. His daughters have extremely nice udders with great udder quality, a deep cleft and squarely placed teats. The udders will be silky and soft and he should be protected for fore udders. You will want to use MASON on a very milky type of cow and he can be used in the heifer lots and will improve DPR.

### Mating Information

Use MASON on daughters of ROY, WESTMINSTER, Juror Ford, GORDON, Lucente, Shaker, BOLIVER.
