 Lifetime: 953d 104,190 3.7 3848F 3.3% 3466P

## Family Information

MEGA-MAN hails from the herd of Twin-B Dairy, Floyd and Lloyd Baumann and Fred Lang of Marathon, Wisconsin. MEGA-MAN'S grand dam was the second cow at Twin-B Dairy to finish with a world record. Muranda Oscar Lucinda-ET attracted much attention from around the World and produced several fine young daughters including MEGA-MAN'S CONVINCER dam. CONVINCER Million has several outstanding daughters sired by Outside, Oman, Throne, Lancelot and Laudan. Lucinda's DARKSTAR daughter Jolie was also a favorite at Twin-B Dairy and she had an amazing will to milk. Floyd and Lloyd comment that Oscar Lucinda and her offspring all have the incredible ability to consistently produce high volumes of production.

## Daughter Information

MEGA-MAN daughters are the top producers amongst their peers. Nine daughters in California in three different herds average 114 relative values with the highest at 132. Two daughters in Juneau, Wisconsin have actual milk production projections at 36,000 and 32,000 pounds of milk, both are problem free with SCC under 50,000 and they are the highest producing 2 year olds in the herd. MEGA-MAN daughters have udders designed for production with tremendous width and height in their rear udders, ideal sized teats placed square on the udder, strong udder clefts, strong fore udders and shallow udders which is amazing with all the milk production. He sires size and will add some slope to the rump. They have excellent mobility with ideal leg set and steep foot angle. The ABS Progeny Promotion team notes they are care-free cattle that produce large volumes of milk with ease.

## Mating Information

MEGA-MAN is not a calving ease bull, so he should be used on the milking daughters of DIE-HARD, SHOTTLE, REECE, GARRISON and MALIN.
