

MOET Nansen

By Andrew Rutter

From one of the most impressive cows at MOET[®], Nansen promises to produce easy care daughters that are built to last. He will sire average sized cattle that are not extremely dairy, showing beautiful legs and feet and picture perfect udders. He also boasts fantastic management traits with +0.3 on lifespan, SCC improvement and good milking speed, ideal temperament and above average for fertility. Expect him to sire long living cows for a commercial environment.

Pedigree Information

Sire: Wilpe Dennis
Dam: MOET Gibbon Cadet C VG85
MGD: MOET Holiday Cadet C VG87
MGGD: Moet Winken Cadet C
Next Dam: Siemers Mars Tony Cadet VG

Family Information

Nansen comes from the great Cadet family. This family is consistently breeding hard working cattle, excellent to manage, easy to milk, easy to breed and really impressive type with legs, feet and udders being particular strengths. Nansen is from one of the best bull mothers tested at MOET[®] over recent years. MOET Gibbon Cadet C VG85 has just completed her second lactation of 16,000kg after producing over 13,500kg in her first lactation. She is a fifth generation bull mother from one of the most consistent cow families to come through Moet. Behind the Gibbon is a VG87 Holiday that has completed 6 lactations. Nansen has a half sister that scored VG87.

Daughter Information

Daughters show impressive power right through from muzzle to rump. Expect Nansen to improve all aspects of udders, particularly in the fore attachment and udder depth. He will add pin width, straighten the leg and add heel depth. Locomotion is a real strength with progeny moving fluidly with great confidence. Nansen will also offer a real outcross opportunity for most markets

Mating Information

He will work well on the ROY, GORDON, JUROR, Principal, Lord Lily, BW Marshall and Durham.

MOET Nansen Daughters: Lydbam Nansen Helen 2
