Best Record: 2x 305d 13602kgs 4.14%F 563kgs 3.22%P 438kgs

### Family Information

PADBURY traces back through the great Papoose family, with this particular line being developed in the UK in Ray Browns Bidlea herd and the Whittakers Knowlesmere herd after the joint purchase of the Blackstar daughter "Papoose Popstar". She went on to leave eight EX daughters, five of them Preludes, one of which is the 3<sup>rd</sup> dam of PADBURY. Via a high milking Jabot daughter we come to the outstanding Jolt Papoose cow, with a muzzle like a loader shovel and a phenomenally veined udder, this is the sort of high profit, low maintenance cow so many of our customers are asking for.

### Daughter Information

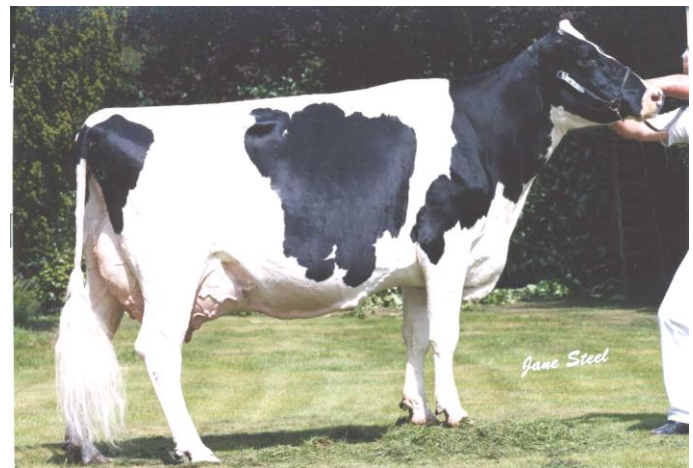

Test daughters tend to be average for stature with plenty of width and strength through the chest, barrel and rump. Leg set when viewed from the side is near ideal with clean hocks and good tight feet. Daughters walk confidently and sweetly, whatever the surface. Udders are blended well into the body, and rear udders are set high with a long lasting look about them, and as a group they boast that lovely texture and prominent veination of the udder that PADBURY's dam has. Daughters are even tempered and quiet to sort and milk. In the parlour they milk out cleanly and without fuss.

### Mating Information

PADBURY will cross nicely on milking daughters of DIEHARD, HOMESTEAD, SHOTTLE, ROY, Oman and Jocko Besne or his sons.
