

29HO11634 V-Bar-K Storm PIERSON TL*TV

by Paul Trapp

PIERSON is one the first active Stormatic sons available in the industry. A quick look at his pedigree shows a sire stack of some of the most modern Canadian genetics in one pedigree as PIERSON is a Stormatic x James x Rudolph. PIERSON is a super overall type and udder improver with a modern pedigree. He has no sire stack equal in the breed today and will be one of the most popular Holstein sires in 2008. PIERSON, remember the name!

Pedigree Information

Sire: Comestar Stormatic EX-CAN
Dam: V-Bar-K James Polly VG-86
Lifetime: 2006d 148080M 4.1% 6018F 3.3% 4927P (3 lactations)

Lifetime: 1740d 132890M 4.0% 5320F 3.2% 4216P (3 lactations)
3rd Dam: Mazestic-Acres (Tesk) Passion EX-90 2E GMD DOM
Lifetime: 1749d 128190M 4.4% 5596F 3.3% 4175P (4 lactations)

Family Information

PIERSON was bred by Barry Bork of Valley Springs, SD. Barry knows type, as he once owned a full sister to JUROR. PIERSON has one VG-86 full sister. His dam James Polly has a VG CONVINCER and a GP PIPPEN maternal sister. We had several contracts on James Polly and Rudolph Perfect but neither cow responded well to flushing and thus PIERSON is one of the few bulls we did get sampled from this exciting cow family. If you do the math, PIERSON is backed by three generations of cows that average 87 points, 4.2% fat, 3 lactations and over 136,000 lifetime milk production.

Daughter Information

PIERSON daughters are tall and wide with very shallow udders. Udder attachments are very strong with great high and wide rear udders but average cleft. Legs track extremely well when viewed from behind and are straighter when viewed from the side. They do have a very deep heel, wide rumps but could use more depth of rib.

Mating Information

PIERSON daughters are stronger made cows, so he would work best on dairy cows sired by PIPPEN, TABOO, ROY, BOLIVER, Titanic, Zenith and Durham.
