POWERSTART[®]
instant

In Cheshire...

"Powerstart Instant is so convenient, you can gauge how much grass you're pulling in and mix as you go. The packs to treat 25 tonnes are a fantastic idea! I've made cracking silage - it smells so sweet, the cows are loving it."

Mr. Jones, Crooke Farm,
Tattenhall, Chester.

In Norfolk...

"We used Powerstart Instant for the first time this year and found it easy to use, with no problems mixing. Resulting in good palatable silage and the cows happily clear the troughs each day, greatly reducing wastage."

Mr. Palmer, Railway
Farm, Kings Lynn.

In Clwyd...

"Sheep - Palatability is higher resulting in a greater appetite in our ewes and a big saving on concentrates. Cattle - Powerstart has a sweet smell resulting in greater intakes and clean troughs. Daily liveweight gain has also increased."

Mr. I Owen, Cefn Bodig, Llanyal, Bala, Gwynedd.

In Cumbria...

"Since using Powerstart, we're producing an extra 1,000 litres per cow. This is due to higher forage intakes and good palatability. It also provides very stable silage throughout the winter."

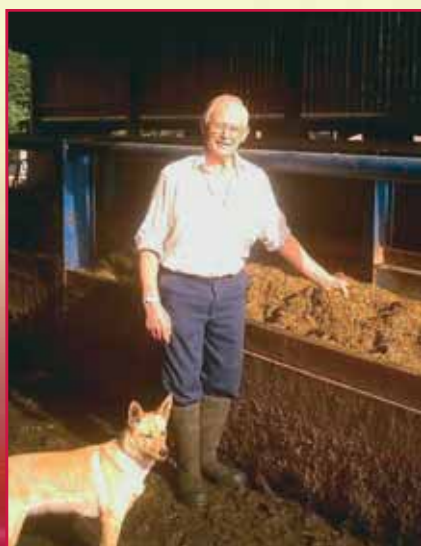

Mr. Simpson, Riggfoot House, Kirklington, Carlisle.

In Derbyshire...

"We feed our cows on round bale silage. The silage made with Powerstart Instant is a lovely golden colour with a sweet smell. Powerstart Instant has been so easy to use and the small pack sizes are great for treating round bales."

Mr. Wood, Hall Farm, Chesterfield.

In Derbyshire...

"We were unhappy with our cows performance and felt we needed to consider making changes for improvements. We heard how good Powerstart was from other farmers, so we decided to try Powerstart Instant. The silage is very consistent and smells fantastic! It's very palatable and the analysis is spot on. The cows are proving what a fantastic product it is by rushing forward to fill themselves up, then lying down contentedly soon after. They've made a great start this winter and we are looking forward to better performance benefits from our forage."

Mr. D Bailey, Cropper Farm, Sutton-on-the-Hill,
Ashbourne.

In Cumbria...

"This is the first year we've used Powerstart Instant on our first cut silage. It looks good and is keeping a cool face. It also provides a good stable base for our mixed ration."

Mr. Shepherd,
Crownstone Farm,
Durdar, Carlisle.

POWERSTART[®]
instant

In Cornwall...

"This is the first year we've used Powerstart Instant and we've found it really easy to mix. The silage stays cool and it feeds extremely well. The cows just love it!"

Mr. Cleave, Middle Fields, Bude.

In Lancashire...

"The cows really like the silage. It smells sweet and fruity. We will certainly be using Powerstart again next year."

Mr. R Butterfield,
Moss House, Carnforth.

In Cumbria...

"We used Powerstart Instant for the first time this year and fed silage from June onwards. The cows certainly liked the silage and milked well. Fat and protein have been very good. The product was good to use and the silage kept very well."

Barrow & Sons, Helm Farm, Ormside,
Appleby-in-Westmorland.

In Cumbria...

"Having used Powerstart Instant this year and no additive last year, we fed silage all summer and were very pleased with the stability and lack of dry matter losses."

Mr. M Sharp & Mr W Sharp, Langthwaite Farm, Millom.

In Yorkshire...

"We make good silage every time we use Powerstart. This year we used Powerstart Instant as we like the convenience of it. The results have been good, producing a palatable silage high in sugar and lactic acid, low in ammonia and volatile fatty acids."

Tinker & Sons, Ashes Farm, Wentworth, Rotherham.
