POWERSTART[®]
ORIGINAL

In Cumbria...

"This is the first year we've used Powerstart. It was competitively priced against other products we've used previously. We're extremely pleased with the sample results. We will be using it for next years crop."

Mr. Young, Crummock Bank, Wigton.

In Aberdeenshire...

"We've used Powerstart Original for the last four years. It's easy to mix and apply. It's reassuring to be able check that it's live before use. We've found it has stopped secondary fermentation so there's less waste, the silage ends up in the cows and not in the spreader."

Mr. Mair, Kinnermit Farm, Turriff.

In Hampshire...

"I started using Powerstart five years ago and silage quality has been very consistent, which I believe is its biggest selling point. Sometimes the weather isn't ideal for silage making but you still have to get on and do it. Powerstart allows you to do this with confidence. I wouldn't be without it now!"

Mr. Cutler, Belney Farm, Southwick, Fareham.

In Shropshire...

"We've used Powerstart Original for the past seven years. The cows leave the trough clean every time. It's a lovely golden colour and smells sweet. Whatever the weather, Powerstart performs, giving me consistently good silage."

Mr. Sillito, The Wellings Farm, Market Drayton.

In Cheshire...

"Ever increasing organic feed prices means there must be emphasis on good quality forage, that's why we use Powerstart Original."

Mr. Mitchell, Walnut Tree Farm, Malpas.

In Devon...

"This is the fourth year we've used Powerstart and we're pleased with the results we've seen. It's really helped with palatability."

Mr. Disney, Loatmead Farm, Tiverton.

In Kent...

"We treat our grass silage and baled silage with Powerstart Original. It's the best baled silage I've ever made! Beautiful colour, dry and sweet. Our cows literally run in from the field to eat it!"

Mr. Edgar, Park House Farm, Westerham.

In Cumbria...

"I've been using Powerstart on our silage for a number of years and have found it sweet smelling, giving good palatability and the cows love it. We are more than happy with the milk yields."

Mr. Barker, Little Broomhills, Carlisle.

Here's what farmers like you are saying

In Staffordshire...

"We have used Powerstart for the past six years and it always gives consistently good quality silage, no matter what the weather. The silage is a nice golden colour, sweet smelling and fruity. It's good value for money and we use it on all cuts of silage."

Mr. G Sanderson (Farm Manager) c/o Lord & Lady Stafford, Swynnerton Heath Farm, Stone.

In Surrey...

"We cut 150 acres for first cut this year, 30 acres were new leys and the rest old. The silage has turned out extremely well. Its dry, smells good, the clamp face is remaining cool and the cows are doing well on it! What more can I say, I will certainly be using it again!"

Mr. Dale, Aldhurst Farm, Dorking.

In Ceredigion...

"We made 30 acres of silage in April this year using Powerstart. When we took the sheet off to finish first cut it was like a sea of gold, its fantastic!"

Mr. Jones, Penlan Y Mor, Llanarth.

In Lanarkshire...

"As a beef farmer the thought of using an additive never crossed my mind, until last year. With the weather being so unpredictable we decided to try Powerstart, I'm glad we did. We made big bale Powerstart silage and the results can be seen in the eating."

Mr. Driver, Howslack Farm, Nr. Biggar.

In Cheshire...

"I've used Powerstart for many seasons on grass and whole crop wheat. The consistently good quality, well fermented and very palatable silage has helped us to achieve the very high yields and top quality milk from our cows. High intakes of quality forage dry matter is reducing the amount of concentrates fed."

Moore & Partners, Byley Hill Farm, Byley, Middlewich.

saying about...

POWERSTART[®]
ORIGINAL

In Devon...

"We use Powerstart Original because its quality that counts for today's milk production."

Cleave Farm Partnership,
Bideford.

In Dyfed...

"I've used Powerstart Original for the past two years with some great looking and smelling silage. The cows just love it. I also made some big bale with what was left over and WOW did they milk!"

Mr. Morris, Maenelin Isaf,
Llanrhystud.

In Cornwall...

"No matter what type of grass or cutting conditions, Powerstart Original always produces consistently high quality silage. This allows us to achieve our dry matter intake targets, to ensure the cows reach their potential to produce more milk with higher fat and protein levels."

Mr. Kitto, Higher Coomber Farm, Liskeard.

In Devon...

"We've been using Powerstart Original for five years now. The cows have milked well, we're very pleased with the outcome."

Mr. Pomeroy, Ley Farm,
Dolsworthy.

In South Scotland...

"Powerstart has again done a wonderful job for us. The cows just love to eat it. This is the third year we've used Powerstart Original and I have no hesitation to buy it again for next year."

Messrs Newbold, Smallrigg Farm,
Lockerbie.

In Clwyd...

"We've used Powerstart since 2003. Since using it, my cows eat the silage clean, compared to before. The silage smells far sweeter, it's more palatable resulting in more milk from forage. The farm is at 1000ft and very difficult to get the weather right, but by using Powerstart Original it's a good insurance. I know Powerstart will work in all weather conditions, come rain or shine."

Mr. Kynaston, Blaidd Isa,
Corwen.

In Cumbria...

"We've treated our silage with Powerstart Original for five years now. The palatability is amazing, our cows can't get enough of it. We've seen many benefits by using Powerstart on our grass."

Mr. Bowman, Skiprigg Farm, Carlisle.

you are saying about...**

POWERSTART[®]
ORIGINAL

In Cheshire...

"We've consistently made good quality highly palatable (sometimes too palatable they get through it that quickly!), high intake Powerstart Original silage that the cows love and milk well off."

Langford & Partners, Owler Hall Farm, Tattenhall, Chester.

In North Yorkshire...

"We've used everything in the past, but Powerstart Original is now our only choice at silage making time. Intakes are up, clamp stability has never been better and the analysis is fantastic!"

Spence & Son, Lowfield Farm, Northallerton.

In South Scotland...

"For five years we've used Powerstart Original and found it makes very palatable silage with a sweet smell to put in front of the cows."

Mr. Dunlop, Searig Farm, Currutherstown, Dumfries.

In Gwent...

"I've used Powerstart Original for the last five years over varying seasons and we've found it both effective and reliable as an aid to making high quality, high sugar, stable grass silage."

Attewell & Partners, Cherry Tree House, Newport.

In Devon...

"I've never made a bad silage in all the years I've been using Powerstart Original."

Heddon & Sons, The Barton, Bideford.

In North Yorkshire...

"We've used Powerstart Original for the past six years and will continue to do so for the next six years! Our cows can't get enough of it, the silage is so stable and there's no waste."

Mr. G Wilkinson, Thorntree Farm, Brompton Bank, North Allerton.

In Derbyshire...

"Powerstart is great to use anytime, but it gives me great confidence when it looks as though the weather is going to turn. It also provides great clamp stability."

Mr. Lucas, Old Hall Farm, Derby.

In Cheshire...

"The quality of the Powerstart silage is excellent. Low ammonia and high sugar content means that dry matter intakes are very high with the consequential reduction in concentrate usage. There is little or no waste in the clamp, ensuring maximum use of home grown forage."

Mr. Clark, Bank Farm, Northwich.

In Dyfed...

"I've been using Powerstart Original for six years and the cows keep performing better every year."

Rees Bros, Pensarnau Farm, Llandysul.
