

**RELIEF AND  
DAIRY HERD REPRODUCTIVE SPECIALIST (R.M.S.)**

**DERBYSHIRE/LEICESTERSHIRE**

Genus ABS is a global organisation that is revitalising the dairy industry with innovation. We need an enthusiastic individual who enjoys a challenge and is capable of achieving great results.

Currently, in the UK we have 120,000 cows on the Reproductive Management System (RMS). This US-developed system is well proven and is at the cutting edge of professional dairy herd management.

This specific approach involves daily herd visits and evaluation of computer-based records to maximise heat detection rates in order to get cows pregnant. In addition you will identify and solve practical issues that are restraining dairy herd fertility.

Training on the specific reproductive management system will be provided.

The ideal candidate will have experience of working with dairy cows and preferably be AI trained. You will require great communication skills to allow you to work with a whole team of people including dairy herd owners, herdspeople, vets and nutritionists.

A highly competitive performance related package is on offer for the right individual, together with opportunities for career progression within a successful dynamic global organisation.

◆ If you are interested please apply in writing to:

Human Resources Department, Alpha Building, London Road, Nantwich, CW5 7JW or email [recruit@genusbreeding.co.uk](mailto:recruit@genusbreeding.co.uk) Quoting DE01 or LE01

The closing date for applications is 3<sup>rd</sup> September 2010. If you have not been contacted within two weeks of this date you have not been selected for interview.
