Best Record: 2x 305d 12058kgs 3.83%F 461kgs 3.30%P 398kgs

Family Information

REUNION harks from one of the most famous UK families, the Ruths. The Patton family at Ards in Northern Ireland have done a tremendous job in developing their branch of the Ruths with generation after generation of powerful, beautifully uddered, hard working cows family. To date 134 Ruths have been classified at Ards and they average a phenomenal 87 points! REUNIONS dam was a perfect illustration of the family, you could run a pig between her front legs, strong top line and hard loin, and a beautiful rear udder, set high and wide and with a terrific crease. She was 1st Junior 2yr old at the RUAS Spring Show 2002.

Daughter Information

The first thing you notice with the REUNIONS is the strength and width of frame. Rumps are wide and strong with near ideal thurl placement, and even as young heifers, REUNIONS have plenty of width through the chest and good fore rib. Udders are snugly attached in the fore with brilliant veination, and set high and wide in the rear, with the Ruth family's trademark deep crease.

Mating Information

Use Reunion to add power and frame to your matings, and he will cross well over milking daughters of BOLIVER, BURT, MANGO, DIEHARD, PIPPEN and Durham blood
