Sand Hill Impuls Kliptink, dam of Kernal

Sand Hill Iatola Kernal J2154

Kernal is bred from an excellent cow family and his dam recently calved for the third time, at 3yrs 10mo. Kernal's EX90 grand dam and EX90 great grand dam are both still alive and he also has an impressive full sister, completing four generations of the family in milk in the 650 cow herd at Hi-Land Farm in the US. Kernal is a son of Iatola, one of the most popular bulls in the Jersey breed in recent years with a fantastic type proof. Kernal offers some different bloodlines, with no Lester, Lemvig, Brook, Montana or Hallmark in his pedigree.
