#### Daughter Information

SANDY continues the family tradition of siring proper type specializing in udders, correct feet and legs along with profitable production yields. The ABS Cornerstone Specialist team notes the SANDY daughter's udders have exceptional crease with nice rear udders that are wider than they are high. They usually give you a great look from behind! SANDY daughters have outstanding feet and legs with ideal locomotion. The daughters are deep and open with great width throughout and very wide correct rumps, they carry Juror Ford's power and substance. However, they are not tall cows and tend to be shorter than average with great balance. Udder texture has been great with lots of veins and they milk out nicely. Two SANDY daughters in at Lee Pattison herd in Garnavillo, IA classified with highest scores on the HFA SET in the herd.
