5 th Dam:	Eastview Mark Bell Mattie G EX-90 EEEV GMD DOM Best Record: 4-10 2x 365d 15,900M 3.8%F 3.2%P
6 th Dam:	Eastview Bell Mars Mattie G VG-87 VEVV GMD DOM Best Record: 7-09 2x 365d 12,310M 4.0%F 3.3%P

Family Information

The Mattie G lineage needs no introduction as performance has been the stamp of this family. Long-lived cows abound from SENTRY'S maternal line and combined with the breeding pattern of Shottle, expect larger frames with plenty of strength and dairyness. SENTRY's dam is sired by Jesther, a Mountain x Elton son that sired femininity and high milk production which her son continues to pass on to his daughters. The MARATHON sister has proven sons as well siring a very similar breeding pattern. You can use SENTRY with confidence that your herd will be well-protected for years to come.

Daughter Information

In the field SENTRY has produced some of the more prominent daughters from a type perspective. The daughters are hard working and milky individuals with high and wide rear udders and tightly attached fore udders. They are average in size with a great combination of dairyness and strength. SENTRY daughters are a little straighter in the leg but walk straight when viewed from the rear. They also have correct slope to their rump structures.

Mating Information

SENTRY can be used in heifer pens on daughters of BOLTON, BURT, DIE-HARD, GARRISON, MELODY, HOMESTEAD, JAMMER and LANGDON. It's best to avoid Elton bloodlines.
