Orreja VG87, dam of Skyhigh Ovid

Skyhigh Ovid SR2033

- Skyhigh Ovid is bred from an excellent cow family. His dam looks fantastic milking in her third lactation and she combines high milk production with very good milk quality – she is the top cow in the Skyhigh herd for protein percentage. His dam also has two impressive maternal sisters in Sweden that have been used as bull dams.
- Ovid has an excellent pedigree. His sire (Orraryd) and Grand Sire (Peterslund) have very impressive proofs based on thousands of daughters milking around the world.
