 MGGD: Borderview Blackstar Lyme VG  
       Best Record: 2x 305d 9060kgs 4.00%F 362kgs 3.10%P 281kgs

### Family Information

If you are looking for consistent longevity and top drawer conformation, then you must surely consider the Lymes, developed and bred at the Goulds Woodmarsh herd in Shropshire, UK. The foundation cow is a 130 tonne Prelude who to date has bred 37 classified descendents who average a staggering 87 points, and the lowest score is GP. The Prelude bred four multi-E daughters, all with at least 60 tonnes of milk under their belt. It is from one of these that TOPSHOT descends, Rudolph Lyme 5. What was always striking about her, was how youthful she always looked, with a tight, well shaped udder that belied the amount of milk she could produce and mobility that mimicked a two year old.

### Daughter Information

TOPSHOT has been dual sampled in the USA and UK, and across the two countries, daughters are consistently impressing. Udders are set well above the hock, with deep creases and lovely texture. Fore udders are blended in and consistently sprayed with veins. Daughters are moderately sized, and carry an ideal level of condition and exhibit lovely balanced frames. He transmits some flex in clean boned hocks resulting in daughters that track sweetly and stylishly. Just like the family behind him, TOPSHOT breeds slow maturing two year olds that have all the potential to flourish and blossom into great herd cows

### Mating Information

TOPSHOT is a calving ease sire and will cross well on daughters NANSEN, MELODY, SIRIUS, DIEHARD, BOLTON, ALTON, BOLIVER, BURT, DYNASTY.
