

# 29HO13463 Lynncrest ZEBRA-ET\*TL\*TV

By Tom Harkenrider

ZEBRA is an exciting Goldwyn son from the highly respected Rudolph Zip family. Dairy producers looking for sires from great pedigrees with exceptional management traits need to look at ZEBRA. ZEBRA daughters calve easily (DCE), produce high quality milk (low SCS), breed back quickly (DPR) for several lactations (PL).

## Pedigree Information

## Family Information

ZEBRA is the latest proven bull to be release from the incredible Rudolph Zip family. He joins his maternal uncle, 29HO11990 Z-DUKE in the active line-up @ ABS. Kirby Horst purchased ZEBRA's dam as a 2 year old in the 2005 Royal Windsor Sale for \$51,000. Zebbee was flushed a few times prior to the sale @ Windsor-Manor, then extensively by Kirby. She had 31 calves from 10 different sires born before she calved for a 2<sup>nd</sup> time @ 4-06. The best of these offspring are a pair of EX-91 Sept Storm sisters, then SHOTTLE daughters @ 91, 90 & 88. The full sister to ZEBRA, Zenita is VG-88 with a Man-O-Man son arriving at ABS soon. ABS continues to work with many branches of this family.

## Daughter Information

Consistency, udders, and extremely correct leg structure will help ZEBRA daughters stand out in a herd. Their legs are ideal from the side, foot angle is steep and all daughters track straight from behind. ZEBRA udders are shallow and well above the hock, as well as high and very wide in the rear. Some udders have some reverse tilt to the udder floor which gives the fore udder a snug but short appearance. ZEBRA daughters are tall enough; more open than strong, and present a correct side profile. Use ZEBRA with confidence to improve feet, leg, and udder traits.

## Mating Information

ZEBRA will cross well on milking daughters of ALTON, AVALANCHE, BOLTON, BRADLEY, CASHMERE, CUMULUS, FABRIZIO, GRANDVIEW, MANAGER, MEGATON, MISSION, MORRIE, PETER and SHOTTLE.
