

Far-O-La GRAYSON-ET*TL*TV 97% RHA

by Paul Trapp

GRAYSON is one of the first Juror Ford sons available in world, and he's from a proven A.I. cow family—the Cleitus Grace family. Juror Ford continues to rank as one of the top TPI Juror sons in the world and combined with the excellent feet & legs and solid management traits, from the Cleitus Grace family makes GRAYSON a very balanced package.

Family Information

GRAYSON's dam was one of my favorite Formation daughters. She calved in the winter of 2000 at Regancrest with a natural CONVINCER bull. Upon seeing this impressive cow, I bought GLINT for ABS. Unfortunately, Glint died in group housing, but today is still over 1500 TPI. Formation Glint was sold in the Regancrest Command Performance Sale that year to current owners Tom & Rick Simon and brother-in-law Rick Demmer of Farley, IA. This team has also bred DRAKE, DAGWOOD, REGAN and MONONA. To-date, GRAYSON has 1 EX and 3 VG maternal sisters. GRAYSON's dam has a VG-88 GMD DOM full sister, 3 VG and 3 EX maternal sisters. GRAYSON's MGD, Cleitus Grace is no stranger to ABS as we have marketed her active sons GARRETT and DEL. Grace is also the dam of Glenwood who is the full brother to GRAYSON's MGD, Oscar Genoa. To date, Cleitus Grace has 9 VG daughters and 7 EX daughters. She has been a great source of fat%, good PL and excellent feet & legs.

Daughter Information

GRAYSON daughters are of a very consistent pattern. They are very balanced between their frame, strength and depth, with exceptionally shallow udders and perfect teat placement. Daughters have excellent locomotion as they track ideally from behind, have ideal set from the side and stand on a steep foot angle.

Mating Information

Use GRAYSON on milking daughters of DIEHARD, CONVINCER, GORDON, ROY, Storm, Principal and BWM.
