

29HO11942 WA-DEL JUNCTION-ET*TL*TV

By Tom Harkenrider

Producers wanting to increase production and improve health and management traits need to look at JUNCTION. This Oman son will increase milk volume and components, while lowering SCS. In addition, the daughters will calve easily to enter the main production center sooner. JUNCTION is an easy to use, no holes type of bull in the Top 10 for TPI!

Family Information

JUNCTION is from the same family that brought us 29HO10792 JET STREAM. The granddam's of both bulls are full sisters. JUNCTION's dam was one of the most profitable cows ever bred in the Wadel herd. She produced 128,530 of milk in four lactations and left 7 Very Good daughters from four different sires. A couple of these daughters place bulls into AI programs. The most recent was JUNCTION's VG full sister Jennifer. ABS sampled two of her sons; 29HO13615 JEEP and 29HO13630 JEHU.

Daughter Information

JUNCTION daughters are built for profitability. They have moderate frames with the right combination of strength and dairyness. They are very mobile and track straight on their real legs. The udder displays a strong center support with an ideal teat size and placement. They also exhibit a high, wide rear udder and a snug fore udder attachment.

Mating Information

JUNCTION is a great bull to use in the heifer pens. He will cross well on daughters of BRADLEY, CASHMERE, DEE, DETECTIVE, DRAKE, DRAMATIC, GARRISON, NILES, REECE, REFLECTOR, SETON, STRATUS and TOUCHDOWN.
