Profit From Genetic Progress

Introduction

Poor udder health in dairy herds can be costly in many different ways. Not only through the cost of treating animals, but also through loss of milk, higher replacement costs and extra labour requirements. That's why it's essential to maintain good udder health in your herd. Good udder health starts in the parlour with your milking routine and the products you use to protect your cows udder health.

Whatever your focus, New Valiant Everyday fits...

Ultimate flexibility...
Ready to use; Pre or post and fits every application system.
New Valiant Everyday – the easy answer that works

You can be certain that the sums add up with New Valiant Everyday... Great quality at a commodity price

You can rest assured your cows will be protected by New Valiant Everyday

New improved Valiant Everyday...

is the teat care product of choice for many of today's progressive dairy farmers, and here's why...

- It is ready to use
- Unique blend of ingredients
- 7.5% lactic acid anti-bacterial levels
- Resistance to organic matter
- Prolonged kill rate
- Extraordinary levels of skin conditioning
- Includes fly repellent

New Valiant Everyday provides a great all-round package for the farmer who wants to control udder health on their farm.

Anti-bacterial ability

Great resistance to organic matter means that Valiant Everyday really is fit for purpose. A blend of penetrating chemicals ensure the 7.5% lactic acid anti-bacterials get to any bacteria wherever they are hiding. Valiant Everyday starts killing immediately and then goes on protecting for at least 8 hours.

Skin conditioning qualities

Containing 18% skin conditioners:
Emollients – enable the skin to retain as much of its own moisture as possible.
Humectants – improve skin condition by drawing moisture into the teat.
Exfoliants – help to ensure that only the freshest, smoothest skin remains.

Greater cow comfort

Along with being pH balanced to be kind to the skin, New Valiant Everyday contains a cutting edge fly repellent leading to reduced irritation and a lower chance of infection.

A great blend...

A super blend of killing and kindness – kind to the cows and cruel to the bacteria. Exactly the blend you need to maintain the good udder health levels required of the 21st century dairy farm.

In summary...

- Milking to milking protection
- Advanced lactic acid system
- Triple acting skin care package
